

PART-TIME\* • 18 MONTHS • HYBRID LEARNING  
(CAN ALSO BE STUDIED AS AN APPRENTICESHIP)

---

**(HIGHER NATIONAL CERTIFICATE)**

# **HNC**

## **IN BIOSCIENCE**

---

West Cumbria offers diverse opportunities for laboratory technicians in industries such as water processing, food production (particularly dairy), and microbreweries.

This course equips you with the necessary skills and mindset to pursue or advance in these positions, both within and outside of the health and nuclear sectors.

**TURN OVER FOR COURSE SPECIFICATION >>**

## COURSE MODULES AND INFORMATION

This HNC course is assessed entirely by assignment work (no examinations) and contains 8 modules. Modules have been designed with local skills in mind, and teaching content has been developed in collaboration with employers.

- Fundamentals of Laboratory Science
- Scientific Data Approaches and Techniques
- Regulation and Quality in the Applied Sciences
- Cell Biology
- Fundamentals of Chemistry
- Anatomy and Physiology
- Microbiological Techniques
- Professional Development

Studying this course will increase your knowledge, skills and experiences within the bioscience field.

When you have successfully completed the HNC qualification, you will have the opportunity to progress to studying our HND in Biotechnology.

## ENTRY REQUIREMENTS

We would expect applicants to have a Level 3 qualification (A Level/BTEC/T Level) in a science-related discipline, as well as GCSE English and maths at a grade 4 /C or above.

However, people working in a science related field without a relevant qualification will also be considered, pending an interview.

All learners will have an initial advice and guidance interview before starting the course.

## OUR LEARNING APPROACH

Your study programme will run from 2pm to 7pm (one day per week - Thursdays) with a mix of live online delivery days and in-college laboratory practical work. The course is also available to study on a full-time basis.

The hybrid learning model will enhance your opportunity to study and develop your career, or start a new career within the bioscience sector.
